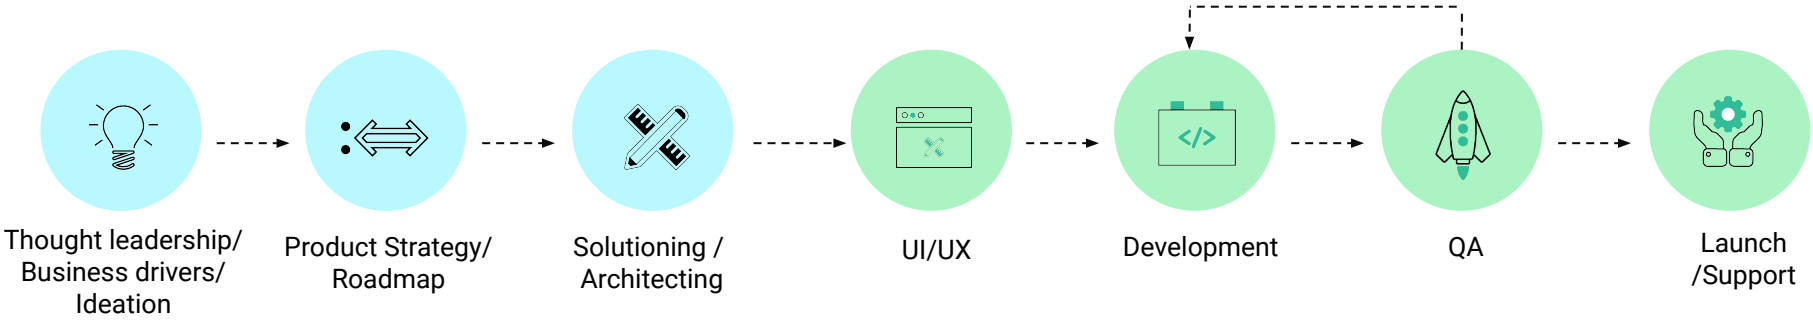
How it Works?



Agile Discovery Workshop

- Accurate identification of project requirements early on.
- Fairly accurate budget and time estimations.
- Market desired, functional and practical project requirements.
- Eliminates restarts and delays.

Agile Delivery Model

- Beautiful and functional designs
- Real-time collaboration between your and our teams
- Prompt issue resolution on every step of development cycle
- High visibility - Continuous feedback
- Strong commitment to deadline

What else we bring to the table

CUSTOMER CENTRICITY

“Our entire approach revolves around creating visibility, involving the customer at each stage and ensuring their success.”

Immediate Start
We can get into action as soon as you’re ready to start work.

Available 24/7
24/7 responsiveness regardless of time-zone

Specialized Experts
Specialised, flexible and scalable dedicated teams for one-off or continuing support

Commitment to Deadlines
We ensure that we stick to our commitments and timelines.

Complete Transparency
Using a combination of various communication and project management tools, we provide completely transparency.

After launch support
We ensure that we fix any issues that arise for free for 30 days after launch.

Fast Development Cycles
Our in-house library of technical resources saves Time & money during development.

In-Depth Requirement Analysis
Our ADW builds tremendous confidence with our clients & teams, before going into the development & delivery phase.

You own your intellectual property
All work is done under standard “Work for Hire” agreements.

You’re in good company.

How Can We Work Together?

We deliver our services through the following engagement models:

1

Fixed Price/Fixed Scope

2

Dedicated Teams

3

Rescue Missions

SUNALGO

PORTFOLIO

TECHNOLOGY STACKS:

Node.js, Ruby on Rails, .NET

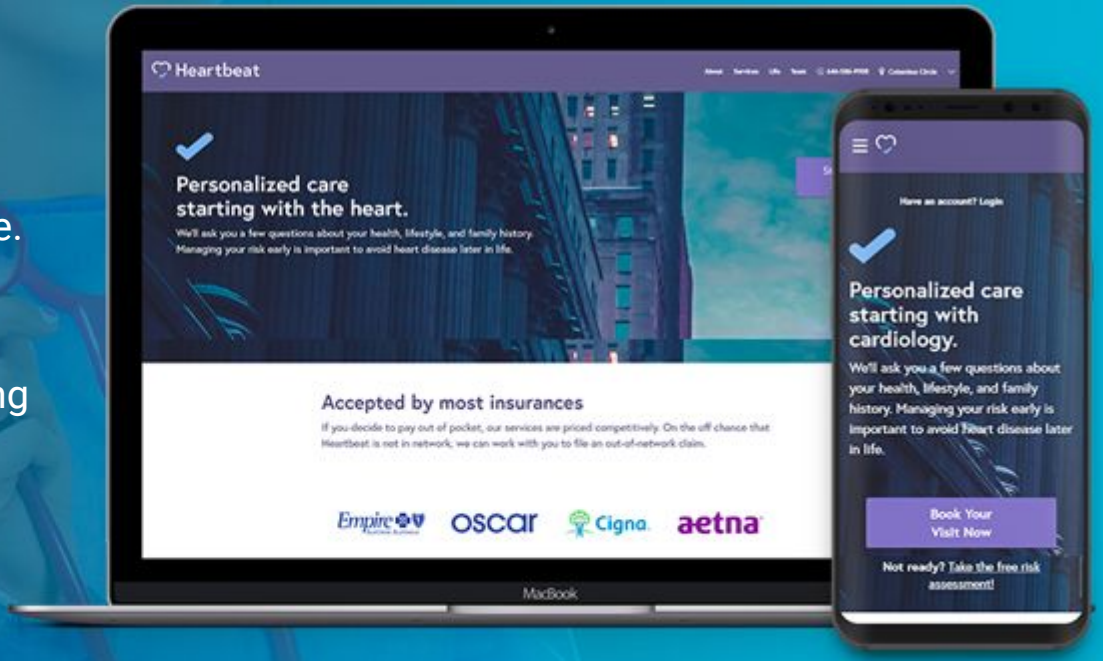
Vue.js, React.js, Bootstrap, Tailwind

Android, iOS, React Native, Flutter

Heartbeat

A modern cardio medical practice company.

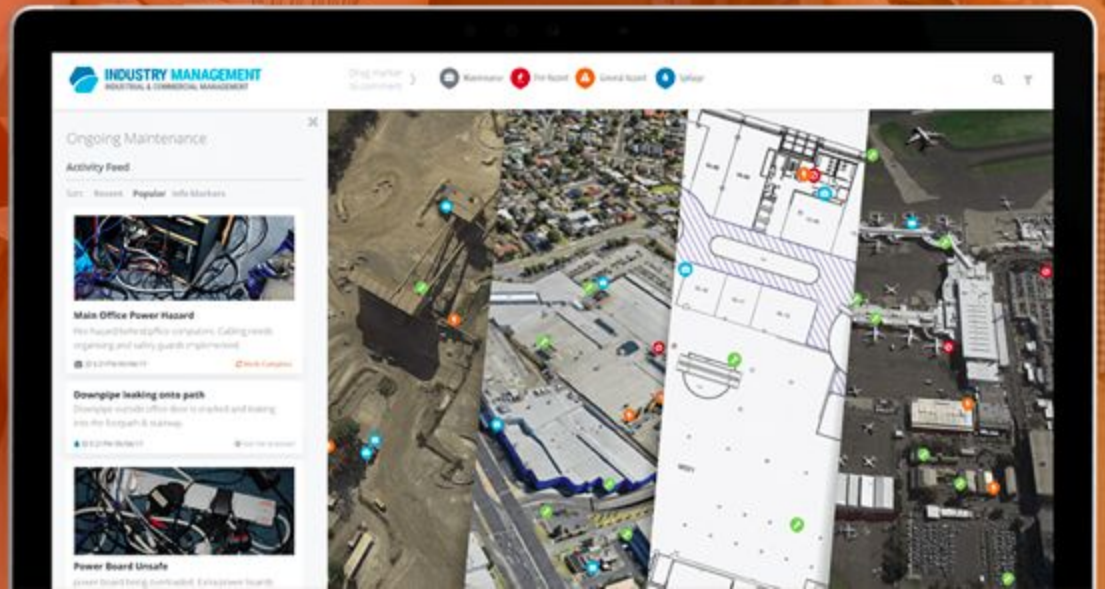
- Custom built their chat engine.
- Digitized the entire cardio practice service itself including easy patient check-ins and challenging Athena integrations.



socialpinpoint

A social portal that helps improve the way organizations engage with their communities and stakeholders.

Upgraded their existing platform with new feature enhancements and customization process.
Also provided expertise in certain technologies that their existing team did not possess.



TeamVelocity™

A marketing retention platform for car dealerships serving hundreds of dealers across the United States with a customer base of 5 to 6 million active vehicles.

Build a fully automated solution for greater operational efficiency and improved business performance.

Created the following modules:

- Personalized Automated Marketing platform
- Consumer Marketing Software
- Dealer Software for Marketing Management

CMAP

A SaaS based project accounting software for project based companies.

Developed their:

- Mobile App
- Outlook Plugin App
- Data Migration App

Currently maintaining all these systems for them.

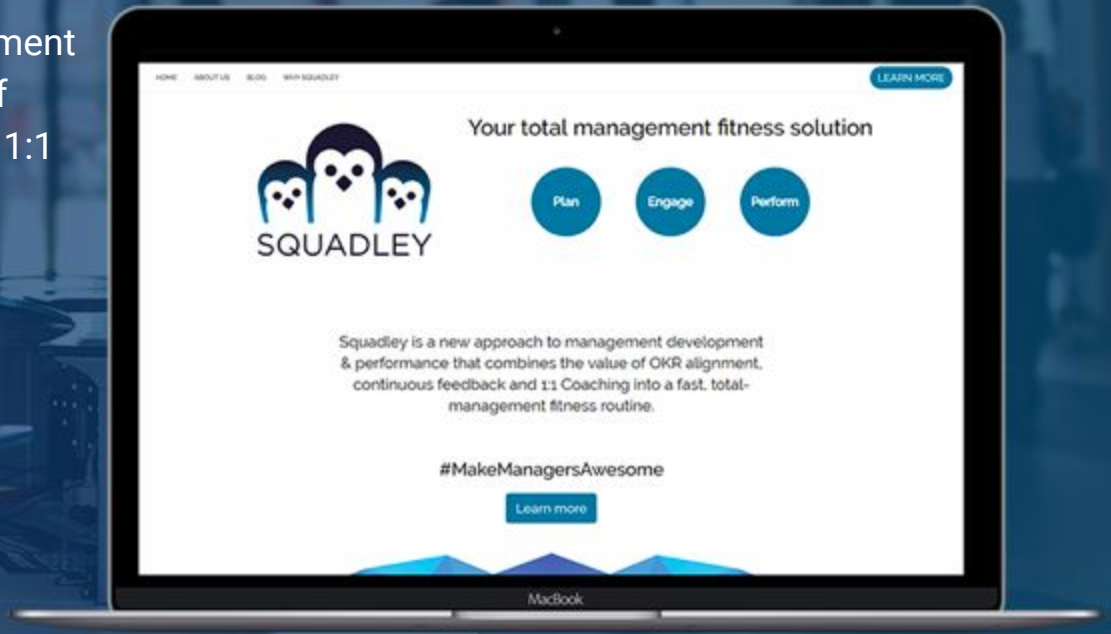
Used by the likes of Morgan Sindall Group, Grimshaw Architects, & Oxford PharmaGenesis.

SQUADLEY

A new approach to management development & performance that combines the value of OKR alignment, continuous feedback and 1:1 Coaching into a fast, total-management fitness routine.

Aided in the development of their virtual coaching platform to make it:

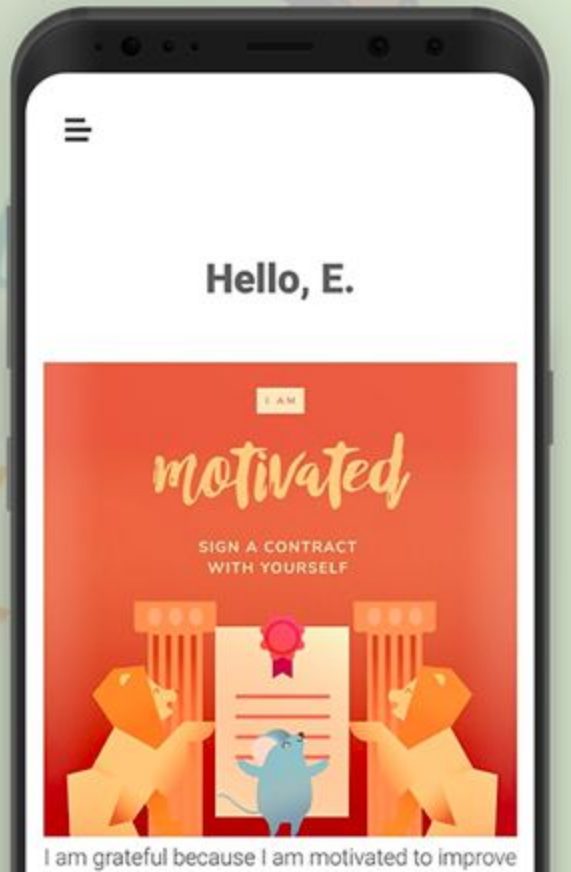
- More accessible
- Easily scalable for future growth and development

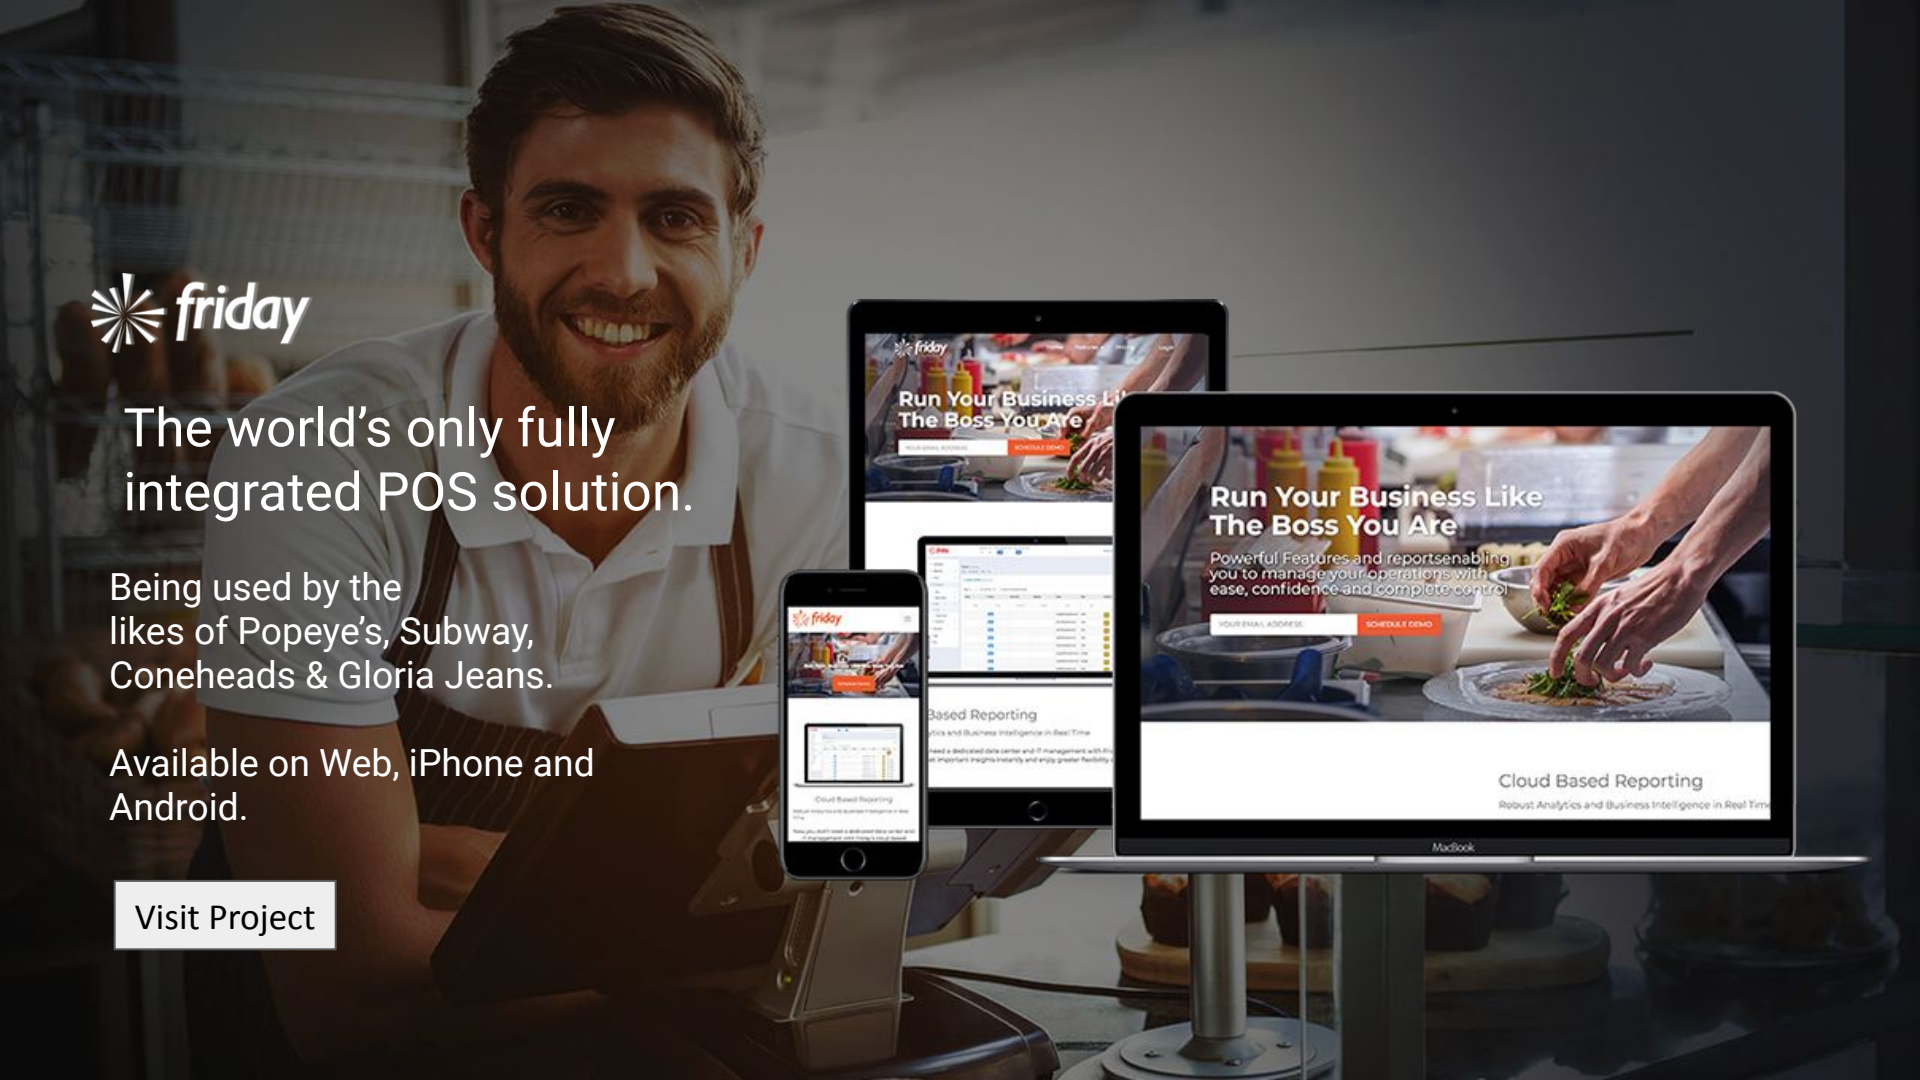


INTENTION **I AM** INSPIRED

An inspiring initiative that takes you on your journey to self-discovery through customized 30 day courses and challenges that help you achieve your positivity goals.

Revamped their web based e-learning platform to better satisfy their existing members and ease the process for onboarding new subscribers.





friday
The world's only fully integrated POS solution.
Being used by the likes of Popeye's, Subway, Coneheads & Gloria Jeans.
Available on Web, iPhone and Android.
